

New World Liquid Smudge

We live in a New World where we have learned to adjust to changing times and so Liquid Smudge was created out of a need to cleanse interior spaces where smoke alarms and fire regulations forbid the use of smudging indoors.

Use it to cleanse and uplift your personal self, use it in offices, at meetings and for healing work, healing circles or indoor ceremonies where fire and smoke is prohibited.

It is a synergetic blend of pure fresh mountain water Thais collects by hand from a natural earth spring, essential oils of Cedarwood, Spruce, Fir, Pine, Sage and Orange oils prayed over and infused with light.

Cedarwood – Used traditionally for ceremony; to enhance spiritual awareness; cleansing and healing; grounding and connecting one to the earth as well as being a natural antiseptic to ward off infection.

Spruce – Used traditionally for ceremony; spiritual cleansing; strengthening connection with spirit and assisting one to be present in the body as well as emotional balancing and calming.

Fir – Used traditionally as a healing plant for grounding and self empowerment as well as relaxing the body; Fir also has an enormous ability to fight airborne germs and bacteria and is very helpful for respiratory conditions so assists in places with air conditioning and stagnant air.

Pine – Used traditionally for spiritual cleansing; as an aromatic to uplift mental and emotional distress and energize the body; also used as a healing plant to ward off infections.

Sage – Used traditionally in ceremony; for brushing away dense energies collected on and around the spiritual body; as an infusion to be rubbed on the body in sweat lodges; it balances and grounds one and has a great ability to fight off infections.

Orange – As well as being an aromatic, orange oil works to uplift and bring a lightness to ones mood.

Directions - Shake well, spray 2 or 3 times, about 1 – 2 feet in front of you then quickly bring the mist towards you with your hands just as you would when smudging. For clearing a room depending on the size of the room anywhere from 2 – 6 sprays would be adequate. Use as needed.
