

JANUARY 2023

WOODFIBRE LNG & FORTIS BC EAGLE MOUNTAIN GAS PIPELINE PROJECTS

Update from Skwxwú7mesh Úxwumixw Rights &
Title and Environmental Working Group

OPEN HOUSE/FAQ NIGHT

We would like to invite you to a WoodfibreLNG and Fortis Eagle Mountain Pipeline project community open house. As we move into construction (soft start of February 2023) we want to prioritize keeping our members up to date with construction timelines, what to expect, and provide an opportunity to answer your questions. This event is being organized and hosted by Squamish Nation, neither Woodfibre or FortisBC will be present.

Dinner and door prizes! Transportation can be provided.

Please RSVP to swiyat@squamish.net

or 778-966-1117

Date & Time:

February 16 from 5:00 - 8:00 pm

Location:

Totem Hall

1380 Stawamus Rd, Squamish

Some topics of discussion are:

- Marine Traffic
- Access or changes to Cultural Activities
- Construction traffic changes
- Pipeline Safety
- Emergency Response
- Camp & Floatel Questions

This update is about environmental regulation. Skwxwú7mesh Úxwumixw Members and businesses seeking employment or business opportunities for the project are encouraged to contact:

**Ta7lnewás (Education,
Employment & Training)**
Paul_Wick@squamish.net

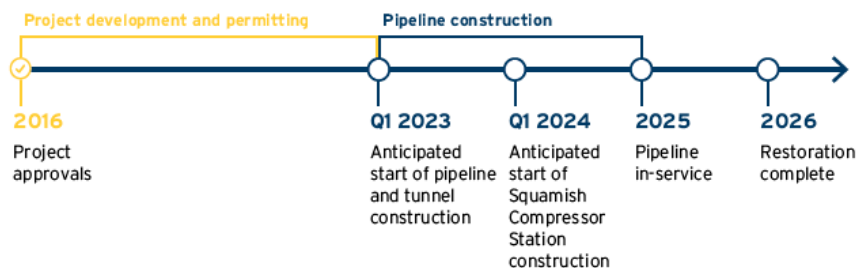

**Nch'kaý Development

FORTIS BC UPCOMING CONSTRUCTION ACTIVITIES

As tunnel construction starts to ramp up we aim to keep you informed. Initial works at the tunnel portal site (indicated below in red - located approximately 1 km from Yekwaupsum 18) will include site preparation, mobilization of equipment, installation of fencing, and grading the surface in preparation for tunnel infrastructure.

Construction at the tunnel portal site will be ramping up closer to summer 2023.

STÁ7MES (STAWAMUS) BRIDGE REPLACEMENT COMPLETE

Details received from FortisBC in August 2022 stated that: "Recent Stá7mes River Bridge inspections conducted by Ministry of Forests, Lands, Natural Resource Operations and Rural Development (FLNRORD) show bridge deterioration requiring action by FortisBC. Engineering review recommended full replacement of the bridge and the new minimum load requirement from FLNRORD for this FSR is L150. This is the basis for the new bridge design."

This 3 month project was successfully completed in December and all access roads are now open.
