Dear Neighbour:

Re: Notice of Extended Working Hours - North Shore Wastewater Treatment Plant Conveyance Project

This letter is to advise you that the Vancouver Fraser Port Authority has approved a request by North Shore Conveyance Partners to extend work hours at the North Shore Wastewater Treatment Plant Conveyance Project (Conveyance Project) pump station from October 29, 2020 for a six-month period. Please see map on reverse for location details.

This temporary extension is required to:

- Conduct dewatering at the pump station site to maintain dry excavated areas as pipe connections are completed.
- Complete excavations during low tides to reduce dewatering requirements.
- Complete small-scale electrical work inside the pump station building while no other trades are working.

What to Expect

- With this extension, approved hours of work will be 24 hours a day, seven days a week, as required, from October 29, 2020 through to April 29, 2021.
- Dewatering requirements will vary throughout this timeframe. Dewatering requires the use of pumps to remove water and may temporarily increase noise levels around the pump station site.
- Noise barriers will be installed on all operating pumps to reduce noise.
- Excavations during the dewatering process and low tides may be required.
- Work during extended hours will be contained to the pump station site, deliveries and removal of materials will occur during regular hours of construction.
- Increases in noise during small-scale electrical work is not anticipated.

The extension does not include other construction activity at the pump station site, which will continue to take place during regular hours of construction (7 a.m. to 8 p.m., Monday to Saturday).

All work conducted at the pump station site is in accordance with *Vancouver Fraser Port Authority Project Permit 17-090*. For questions regarding the port authority's approval of these works, please contact the Community Feedback line at 604-665-9004 or community.feedback@portvancouver.com.

We appreciate your patience during this work. If you have any questions about the work described in this notice, or to sign up to receive Project updates, please contact the **Community Liaison Officer** at **778-382-9011** or NSCPsupport@kenaidan.com.
