

# Regional Water Meter Upgrades Project

We're working in your neighbourhood to improve the delivery of clean, safe drinking water.

UPCOMING GROUND INVESTIGATION WORK

March 11, 2021

## Project overview

Metro Vancouver provides clean, safe drinking water to residents and businesses across the region through a system of dams, reservoirs, pump stations and water mains. Operating our vast drinking water system requires constant upgrades, repairs and expansion to meet the needs of a growing population.

Metro Vancouver will be upgrading an existing water meter located along the Capilano Water Main Corridor ("Capilano Corridor") and Rivers Drive (please see map on reverse for location). This project is scheduled to take place in summer 2021. Residents and businesses will be notified closer to construction with further information on project details.

## Upcoming work

In preparation for this project, Metro Vancouver crews will be conducting ground investigation work in the project area to verify the locations of existing utilities and confirm soil conditions before construction begins. This work will require crews to be on site on March 18, 2021.

There may be short periods of times when Rivers Drive will be single lane alternating traffic, please follow the direction of traffic control personnel and directional signage on site (please see map on reverse for traffic impacts).

Thank you for your patience as we complete this necessary work.

### COVID-19 and Delivery of Essential Services

Metro Vancouver continues to closely monitor developments regarding COVID-19 and our paramount commitment is to maintain essential services to the region while protecting the health and safety of our employees, contractors, residents and businesses. Metro Vancouver's construction projects are key components in ensuring the ongoing delivery of essential services as defined by the Province of BC. Metro Vancouver follows the guidance of the Provincial Health Officer and is taking all necessary measures to ensure our work sites remain safe and healthy.
