

Ayas Men Men Child & Family Services

PREVENTION & COMMUNITY AWARENESS

The Prevention & Community Awareness team develops special projects to deliver information on child & family services to the community.

The main objective of this division is to make sure there is enough support in the community for families to survive crises without having to put children into care, and for the entire family to lead healthy, productive lives. This involves leading an outreach team, developing educational programs as well as personally educating the community on awareness and warning signs, as well as advising members of support systems available and where to turn in times of crisis.

Steps to Receiving Services:

Step 1:

Phone Intake Social Worker

Step 2:

Sign Support Service Agreement

Step 3:

Referrals are made for services

Referrals must be complete with the AMM Intake Social Worker.
