

APRIL 2026

WOODFIBRE LNG PROJECT UPDATES

Update from Ta na wa Yúus ta Stitúyntsám
(Rights and Title Department)

FLARE STACK BEING CONSTRUCTED AT WOODFIBRE LNG

We wanted to notify Squamish people that the Woodfibre LNG project will be constructing their flare stack in May 2026. This will likely be visible from the Town of Squamish as it will be approximately 134m tall. It will be secured with guy wire anchors and have a flashing light running 24hrs per day to meet federal regulatory requirements as an aircraft warning light.

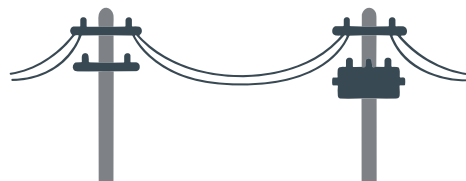

There is no natural gas in the system as both the pipeline to the site and the facility itself are still being constructed. In 2027 flaring is expected to begin as part of the plant's start up processes. This can only happen once all the required permits are in place, including the Waste Discharge Authorization from BC Energy Regulator.

In advance of flaring, we will continue to provide information about what to expect, when and why flaring is happening, and respond to concerns and questions.

Woodfibre LNG project updates can be found on the website ([News | Woodfibre LNG](#)).

BC HYDRO'S PROPOSAL FOR WOODFIBRE LNG'S INTERCONNECTION PROJECT

Since the Woodfibre LNG project was approved in 2015, it was known that additional power would be needed to run the facility (this is to run the project at the original LNG capacity it was approved for). Supplying electricity to the Woodfibre LNG site supports their [Roadmap to Net Zero](#) (rather than burning natural gas as is done at most sites).

Ta na wa Yúus ta Stitúyntsám (Rights & Title) is currently reviewing BC Hydro's application to construct this new powerline to the Woodfibre LNG project. The proposed project includes a new powerline following alongside the existing 1L31 powerline from Cheekye substation to swiýát, upgrades to the Cheekye substation, and thermal upgrades to sections of line 2L1 that runs from Bridge River to Whistler. Pending approvals, construction would begin in 2028 so there is lots of time for input and review. Although BC Hydro is in the very early stages of planning we wanted to provide some answers to frequently asked questions:

Q: *Will residents of District of Squamish experience an increase in BC Hydro rates?*

A: Woodfibre LNG is paying for the construction of the project and will pay normal rates so there is no change to BCH customer costs.

Q: *Who will be monitoring for archaeological sites, culturally modified trees (CMTs), etc.?*

A: Ta na wa Yúus ta Stitúyntsám department will be reviewing the cultural and archaeological considerations for the project.

Q: *When and how will BC Hydro consult with Skwxwú7mesh Úxwumixw people including Elders?*

A: BC Hydro and Ta na wa Yúus ta Stitúyntsám plan to have community meetings as the project details start coming together.

Q: *Where can I view more information about the project?*

A: Please visit:

<https://wlnginterconnectionstage2.com>
and keep a look out for future newsletters that will include updates as the project moves ahead.

We are committed to incorporating your feedback into the process. If you have any further questions please contact swiyat@squamish.net.

WE WANT TO HEAR FROM YOU!

Have you been impacted as a result of the current construction activities that are taking place?
