Squamish Nation Strategic Plan 2026–2030

The Strategic Plan is comprised of four priorities that define the focus of our government for the years 2026–2030 as we work towards our vision.

"Our Council holds two simultaneous and equally important responsibilities: addressing the urgent needs of our community, while setting the course to achieve the long-term goals of our Nation."

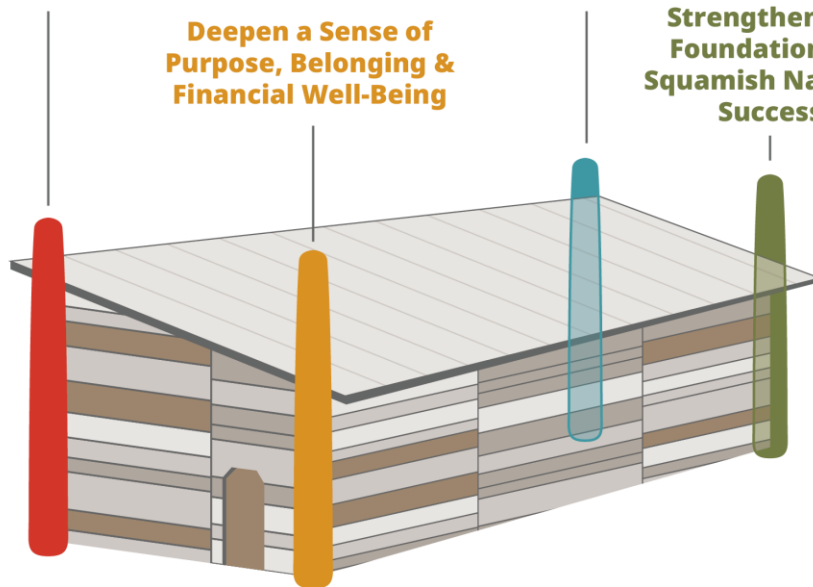

Sxwíxwtn, Wilson Williams
Council Chairperson

**Build Healthy,
Safe, Complete
Communities**

**Deepen a Sense of
Purpose, Belonging &
Financial Well-Being**

**Expand Protection
& Control Over
Lands and Waters**

**Strengthen the
Foundation for
Squamish Nation's
Success**

Each priority is supported by objectives and commitments.

- **Objectives** are measurable outcomes that allow us to track progress and assign accountability.
- **Commitments** are the specific work that Council will advance to deliver these objectives over the next four years

Priorities	Objectives
Build Healthy, Safe, Complete Communities	• Our People are coming home to complete, affordable communities built to our own standard. • Our People have what they need to be well: the supports, the resources, and pathways to heal in a Skwxwú7mesh way. • We have reduced the harms tearing our families apart and built a safety system that reflects our values.
Deepen a Sense of Purpose, Belonging & Financial Well-being	• Our People—wherever they live—have meaningful connections to their culture, their territory and each other. • Skwxwú7mesh Sníchim use is growing with more speakers, more learners, more teachers, more places where it is heard. • From K-12 to careers, our People have the pathways to dignified economic security.
Expand Protection & Control Over Lands and Waters	• We are asserting our title, and we have the evidence, resources and strategy to defend it. • Skwxwú7mesh presence, authority, and jurisdiction are visible, recognized, and exercised throughout our territory.
Strengthen the Foundation for Squamish Nation's Success	• We continue to build a strong financial and administrative foundation for today and for the generations that follow. • Skwxwú7mesh People know what Council is doing and why — and can hold us accountable. • We are strengthening self-determination in our governing structures, building systems to govern ourselves in our own way in these times, and our People are running them. • We are supporting our entities and partners to increase their performance and accountability.
